PROFESSIONAL SUMMARY

I am an experienced website developer with 7+ years of expertise in e-commerce solutions, websites - responsive design.

I focus on creating scalable, user-friendly websites that not only looks great but also align with business goals and deliver exceptional user experiences.

With Strong problem-solving abilities, a passion and expertise in both frontend and backend development, I'm committed to producing lasting, reliable results, ensuring seamless integration and optimal performance for every project I undertake.

Adept at working in Agile environments and collaborating with cross-functional teams to meet business goals.

TECHNICAL SKILLS

- ✅ **Frontend**: HTML5, CSS3, JavaScript, React.js, Vue.js, Next, Redux, Bootstrap, SASS, jQuery
- ✅ **Backend**: Node.js, Express.js, KeyStone.js.
- ✅ **Databases**: MongoDB, MySQL, Firebase
- ✅ **Version Control**: Git, GitHub, GitLab
- ✅ **Web Services**: RESTful APIs, GraphQL, SOAP
- ✅ **Cloud & Deployment**: AWS, Heroku, Docker, Nginx
- ✅ **Other Tools**: Trello, Postman, Webpack, NPM, Yarn
- ✅ **Reliability**: Excellent communication skills and dependable delivery timelines.

PROFESSIONAL EXPERIENCE

Full Stack Web Developer

Divine Light - Calgary

December 2023 – May 2024

- Led the development of a highly scalable e-commerce web application using **React.js** on the front end and **Node.js** with **Express.js** on the back end, supporting over 10,000 active users daily.
- Designed and implemented **RESTful APIs** to connect front-end components with back-end data, resulting in a 25% improvement in response time.
- Integrated payment gateway (Stripe) to process transactions securely, achieving a seamless checkout experience.
- Used **MongoDB** and **Redis** to optimize application performance, reducing query latency by 30%.
- Collaborated with designers and product managers in an **Agile/Scrum** environment to ensure the final product met business needs.
- Deployed applications to **AWS EC2** instances and utilized **Docker** for containerization.

Web Developer

National Bank - Montreal

January 2020 – November 2023

- Developed and maintained a **real-time chat application** with **React.js** for the front-end and **Node.js** for the back-end, integrating **Socket.IO** for WebSocket communication.
- Improved application loading time by 40% through code optimization and reducing unnecessary API calls.
- Implemented user authentication and authorization using **JWT** (JSON Web Tokens) and **OAuth2**, ensuring secure access control to sensitive data.

- Refactored legacy PHP code into **Node.js** applications, improving code maintainability and scalability.
- Wrote unit tests with **Jest** to ensure high code quality and reduce post-deployment bugs by 20%.

Junior Full Stack Developer

Capital One - Toronto
November 2017 – December 2019

- Assisted in building a **social media platform** using **Vue.js** and **Node.js** that allowed users to post, comment, and share content.
- Built **CRUD** operations for managing user profiles, posts, and comments with a **MySQL** database.
- Integrated **Google Maps API** to display location-based services for users, improving user engagement by 15%.
- Collaborated with front-end and back-end teams to integrate a custom CMS, allowing non-technical users to manage content easily.
- Ensured responsive design using **Bootstrap** and **CSS3**, providing a seamless experience on both desktop and mobile devices.

EDUCATION

Bachelor of Science in Computer Science
Simon Fraser University *Graduated: October 2017*

- Relevant Coursework: Data Structures and Algorithms, Web Development, Databases, Software Engineering, Operating Systems
