SUMMARY

Passionate full-stack developer with the proven ability to work in an agile environment while consistently delivering world-class solutions. Very experienced in performance optimization and enhancement of user experience by consolidating extended and complex client requirements into succinct technical plans. Exhibits a high degree of delivery on improving standards of coding to minimize errors, enhancing efficiency, and ensuring fluent application development. Able to bridge gaps in technical-nontechnical stakeholder divides, ensuring project communication and effective alignment. Committed to leveraging advanced technologies and innovative solutions to advance the technological development/excellence profile of the group.

EXPERIENCE

04/2022 - 11/2024

Location

Fullstack Developer

Pannu Corp

- Led design and code review sessions for a team of six, offering actionable feedback that enhanced coding standards, reducing production bugs from 12 to 4 per month
- Automated TypeScript typing generation by creating scripts that analyze schema structures, saving over 20 hours per month on query handling tasks
- Implemented a Progressive Web App (PWA) with Service Workers, improving offline browsing functionality by 10% and increasing user engagement by 12% across devices
- Reduced development time by 15% through effective project refactoring and the implementation of new technical strategies
- Worked closely with the UX/UI team to refine the design, which led to a 20% improvement in user satisfaction as measured by post-interaction surveys

02/2020 - 02/2022

Location

Fullstack Developer

HubSpot

- Enhanced backend API performance by optimizing database queries, reducing response times by 15% and improving reliability for high-traffic marketing campaigns
- Developed automation tools for lead tracking and email campaign scheduling, decreasing manual input errors by 20% and streamlining sales workflows
- Refactored customer dashboard components, improving page load speed by 10% and ensuring smooth data updates for real-time insights
- Integrated third-party analytics and CRM tools, improving data consistency across marketing platforms and reducing synchronization issues by 25%

10/2018 - 01/2020

Location

Fullstack Developer

ThoughtWorks

- Led the design and development of scalable, cloud-native applications, improving client business operations, including sales efficiency and customer retention by 20%, through the integration of technologies such as React.js, Node.js, and AWS
- Implemented comprehensive unit and integration testing frameworks, achieving 90% test coverage and reducing post-production bugs by 20%, as indicated by fewer bug reports within 30 days post-deployment
- Collaborated with cross-functional teams to deliver high-performance web solutions, enhancing user engagement by 15%, as measured through increased active user sessions and retention metrics
- Optimized application performance by reducing page load times by 35% through advanced performance tuning, enhancing user experience and boosting customer satisfaction

08/2017 - 09/2018

Location

Fullstack Developer

Liferay

- Designed and implemented secure payment processing systems by integrating multiple payment gateways, ensuring PCI DSS compliance and reducing transaction risks by 25%
- Developed a comprehensive customer service portal with live chat support and an extensive FAQ section, reducing response times by 20% and enhancing customer satisfaction by 10%
- Developed a robust customer service portal that included live chat support and comprehensive FAQs, improving response times and customer satisfaction
- Integrated AI-driven features to deliver personalized shopping experiences, boosting customer engagement by 18% and increasing satisfaction scores by 15%

EDUCATION

Bachelor's Degrees
University of California
- Relevant Coursework: Data Structures, Algorithms, Web Development, Blockchain Technology
